

Sandeep Sharma

Software Engineer

Kolkata, India | (+91) 9674417830 | sandeepsharma96744@gmail.com | [LinkedIn](#) | [Portfolio](#)

OBJECTIVE

Java Software Engineer with hands-on experience in fintech, building microservices, RESTful APIs, and full-stack applications. Currently developing financial microservices at StyloPay, with prior experience as a freelance Coding Specialist at Uber and a Java Developer Intern at mthree (formerly Wiley Edge). Skilled in Spring Boot, Java, SQL, and Agile environments, with a focus on clean, scalable, and maintainable solutions.

EXPERIENCE

StyloPay – Kolkata Jul 2025 – Present
Software Engineer

- Built, developed, and now maintain Wallet & Prefund Management microservices — including API design, strengthened validations, improved logging with secure data sanitization, and restructured modules with dedicated controllers for cleaner separation of concerns.
- Led the migration of User Onboarding microservices from Java 8 to Java 17 with full code restructuring per code review committee standards, improving performance, code quality, and maintainability.
- Enhanced the AWS Cognito wrapper's authentication flow with code updates and additional fields, completing sign-in, sign-up, and user management across internal portals.
- Managed source control and code reviews using Bitbucket across all microservice repositories.
- Responsible for API Gateway configuration, mapping all microservice endpoints to their respective routes for consistent, centralized API access.
- Enhanced the internal dashboard to be fully mobile and tablet responsive, improving accessibility across devices. Improved overall UI and implemented key updates based on continuous feedback from the CRM team.

Uber (via eTeams) – Remote Sept 2024 – Jan 2025
Freelance Coding Specialist

- Resolved tickets by implementing minor Java code changes, adding meaningful inline comments, and aligning code structure to improve readability and maintainability.
- Collaborated remotely on task-based assignments, debugging and improving existing codebases to meet project requirements and quality standards.

Mthree (formerly Wiley Edge) – Remote Apr 2024 – Sept 2024
Java Software Developer Intern

- Completed intensive training in Java development, database management, and software engineering best practices with a focus on clean code principles.
- Built scalable Java-based solutions with RESTful APIs, gaining hands-on experience with Spring Boot, JDBC, SQL, and Git in team-based workflows.

EDUCATION

2019 – 2023	Bachelors in Computer Science & Engineering	Govt. College of Engineering & Ceramic Technology	9.66 CGPA
2018	ISC	St. Sebastian's School	85.8%
2016	ICSE	St. Sebastian's School	89.66%

PROJECTS

- Card-as-a-Service (CaaS) Platform | Java 17, Spring Boot, MySQL, REST APIs, API Gateway, Jenkins**
- Developed 40+ RESTful APIs for a card issuing program, covering cardholder onboarding and wallet/prefund management.
 - Built cardholder onboarding APIs that register users and hand them off into the KYC-verified wallet and card flow.
 - Developed wallet and prefund APIs for balance management and funding operations.
 - Integrated transaction webhooks and built the webhook notification templates, so external systems receive consistently formatted updates on wallet events.
- StyloPay API Documentation Portal | Docusaurus, Mintlify, Node.js, Spring Boot, React JS, Postman**
- Built and maintain the API documentation for external developers integrating with the CaaS APIs, covering three products: HashDT, ZOQQ, and HashTag.
 - Documented APIs across Docusaurus and Mintlify, with some product docs on each platform.
 - Delivered a live API testing playground and Postman collection import so developers can try endpoints directly from the docs.
 - Kept API references aligned with backend changes to reduce integration friction.

SKILLS

Languages: Java, SQL, C++, C, JavaScript | **Frameworks & Tools:** Spring Boot, React JS, Node JS, Docusaurus, REST API, JDBC, Firebase, AWS Cognito, API Gateway, Jenkins | **Developer Tools:** Git, GitHub, BitBucket, IntelliJ, Eclipse, VS Code, Postman, Grafana | **IT Constructs:** Microservices, OOPs, Data Structures, DBMS

ADDITIONAL INFO

Certified in InfyTQ (2022) | NPTEL: Programming in C++ (2021), Speaking Effectively (2020), R Programming (2019) | Completed foundational Java & MySQL training at Cognizant.
